TEENAGER BTC LITEPAPER TBTC

TeenagerBTC (TBTC) wants our BTC (Bitcoin) to be the currency of the crypto-universe. Teenagers are reckless. They don't follow the rules and are on the cutting edge of building their own future. Same as our token, we will not respect the market, to hell with rules and statistics, TeenagerBTC will be whatever it wants to be and no one will stop it, we came to dominate the world and you decide if you join us or not because the journey will begin and by no one will be expected. Be wild, be rebellious, be TeenagerBTC.

TOKENOMICS!

Total Supply 10,000,000. 

Burned Dev Tokens 1,850,000. 

PreSale Tokens 5,500,000. 

Liquidity Tokens 2,450,000. 

Teenager BTC employs 3 simple functions: Reflection + LP acquisition + Burn in each trade, the transaction is taxed a 5% fee, which is split 2 ways.

- 2.5% fee = redistributed to all existing holders
- 2.5% fee is split 50/50 half of which is sold by the contract in to BNB, while the other half of the TEENAGERBTC tokens are paired automatically with the previously mentioned BNB and added as a liquidity pair on Pancake Swap.

TEENAGERBTC WILL HOLD TWO SALES

TeenagerBTC will be whatever it wants to be and no one will stop it, we came to dominate the world and you decide if you join us or not because the journey will begin and by no one will be expected. Be wild, be rebellious, be TeenagerBTC.

- 1) The first one will be carried out in the pre-sale format through the DxSale platform in which 55% of the total supply will be deposited, which is equivalent to 5,500,000 TBTC tokens. The benefits of the pre-sale are based on obtaining more tokens per BNB invested in relation to what we would get from buying the token through PancakeSwap.
- 2) The second will be carried as the final release of the token to the general public by the PancakeSwap platform with a total supply of 2,450,000 TBTC tokens.

In TeenagerBTC a burn of 18.5% of the total supply, equivalent to 1,850,000 TBTC tokens was conducted for the purpose of benefiting the investors participating in this project.
